STILL IN THE FUNNEL

OPEN OPPORTUNITIES BY CURRENT STAGE (S1–S6)

FROM PSM VS SALES-GENERATED

SOURCE	OPPORTUNITIES	VALIDATED	DROPPED	VISITS	CLOSED	WIN %	TOP DROP REASON
From PSM	340	116 (34.1%)	109 (32.1%)	54	**6**	**1.8%**	Price Was High
Sales-generated	331	210 (63.4%)	48 (14.5%)	28	**23**	**6.9%**	Price Was High

“From PSM” = the opportunity's lead was owned by a PSM, or its PSM field names one. Sales-generated = the Sales Person's own lead, or an opportunity added directly with no lead.

BY MONTH opportunities / closed

	FROM PSM	SALES-GENERATED
Aug	84 / **3**	83 / **15**
Sep	181 / **1**	127 / **6**
Oct (MTD)	75 / **2**	121 / **2**

Rananjay	1	0	0	0	**0**	0.0%

Sales owner = Sales Person on the Qualified Lead. Left out: Sowmya 20, Magppie 7 (PSM / integration user). 323 of these 671 opportunities name a PSM in the PSM field.

WHAT THE NUMBERS SAY

- **Sales' own deals close far better.** Sales-generated opportunities closed 6.9% (23 of 331); those from PSM closed 1.8% (6 of 340) and were dropped 32.1% of the time.
- **Biggest drop-off is after validation.** 326 of 671 opportunities were validated (48.6%) but only 29 closed (8.9% of validated).
- **Price is the main reason for losing.** “Price Was High” accounts for 89 of 157 drops (56.7%); next is “Not Convinced With Wellness Product” (27).
- **Month:** Aug opportunities closed best (18, 10.8%); Sep closed 7 of 308 (2.3%). Newer months have had less time to close, so this gap will narrow.
- **People (25+ opportunities):** Rahul Mahajan converts best (6 of 58, 10.3%); Harshita Magppie has 0 closed from 57. Ashish holds the most opportunities (162) and the most drops (56) but closed 3.
- **Action:** 140 open opportunities have no Current Stage and only 82 carry a recorded visit, so make Current Stage and Meeting Date mandatory updates, and give the team a price-objection playbook.

CRM mapping and assumptions

MODULES

- **Leads** (UI “Raw Leads”): created date `Created_Time`, status `Lead_Status`, owner `Owner`. Links forward through `Converted_Contact`.
- **Opportunity** = Contacts (UI “Qualified Leads”). There is no separate opportunity module. Stage = `Client_Status` (“Current Stage”, S1–S6, Closed, Dead).
- **Orders** = Deals (UI “Orders”), linked to the opportunity by `Opportunity_Name` (“Client Name”). Orders are opened at design stage, so an Order alone is not a win.
- **Visit Module** holds installation, AMS and complaint visits, not sales visits, so it is not used.

LEAD STATUS → FUNNEL STAGE

- **Qualified:** Qualified/ Drawings Awiated, Drawing Received, Create Opportunity, Make Opportunity, Convert, or any converted lead.
- **Dropped:** Junk Lead, Not Interested, Lost Lead, Not Qualified, plus invalid leads (Dead Reason set, Reason for Cold “Invalid Lead”, or Disposition “Invalid Number”).
- **Not yet qualified:** Not Contacted Yet / blank; No Response/ Call Back Later, Attempted to Contact, Not Responding, Cold; Under Follow Up, Contacted, Follow Up, HOT, Warm, Pre-Qualified, Call Initiated, Re-Attempted, Human Intervention Required (AI); Will buy in Future, Contact in Future.

AMBIGUOUS, AND WHAT I ASSUMED

- “No Response/ Call Back Later” and “Will buy in Future” are kept open, not dropped. Dropping them would add up to 1,050 PSM leads to Dropped.
- “Pre-Qualified” is not counted as qualified.
- **Closed (won)** = Current Stage “Closed”, Status Order Booked or later (Handover To Post Design, Update Order Stages, Site Approved For Dispatched, Final Handover…), Actual Closure Date set, or a linked Order at Order Booked or later.
- **Visit done** has no dedicated field. Counted when a Walk-In date, Meeting Date (Qualified Lead) or EC meeting date is on or before 24 Oct, or Disposition is “Visited Showroom”. These are booked dates, not confirmed attendance, and many visits are never entered, so treat the visit count as indicative.
- Sales “qualified” = validated (Current Stage S2 or later, or closed). S1 and blank stage are “not yet qualified”.
- Sunrooof records and records named “test” are left out, as the Monitoring dashboard does.

Assumptions & data notes: date field = Created_Time (IST), 1 Aug – 24 Oct 2026; fetched with paginated getRecords, read-only: Leads 2,999 (back to 30 Jul; 2,934 in period; excluded 11 test record; 34 Sunrooof product; 2,243 PSM-owned), Qualified Leads 2,000 (1,898 in period; excluded 42 Sunrooof product; 2 test record; 109 bulk import 11-12 Aug (old handed-over customers); 1047 bulk import 6 Aug (blank records); 671 sales-owned), Orders 1,800. Reconciles: PSM 2,243 = 677 dropped + 1,144 not yet qualified + 422 qualified; Sales 671 = 157 + 188 + 326. PSM leads include 169 HYD event leads loaded at once on 22 Sep.
